EDUCATION

University of South Florida Tampa, FL

B.S. in Cybersecurity, Bellini College of Artificial Intelligence, Cybersecurity, and Computing *Expected Dec 2027*

- GPA: 3.82/4.00 | Dean's List: Fall 2025, Spring 2026
- **Coursework:** Information Security & IT Risk Management, Penetration Testing, Computer & Information Networks, Cloud Computing, Hands-on Cybersecurity, Data Structures & Algorithms, Intro to Databases, Object-Oriented Programming

PROJECTS

SSH Brute-Force Log Analyzer

- Wrote a Python script that parses Linux SSH authentication logs (auth.log) and extracts the source IP from every failed login
- Counts failed logins per IP with a dictionary and flags likely brute-force attackers that exceed a set threshold
- Documented results and limitations on GitHub, including planned detection for time-based thresholds and successful logins after repeated failures

AWS Cloud Networking Labs

- Built VPCs with public and private subnets, route tables, and security groups to segment traffic and limit access

Hack The Box Labs

- Completed 20+ modules and 5+ machines covering network enumeration, exploitation, and buffer overflows with Nmap and Metasploit
- Analyzed Windows event logs, kernel telemetry, and network traffic, mapping activity to MITRE ATT&CK techniques and indicators of compromise

USF Hack The Box Capture the Flag

- Placed 31st on a 3-person team, solving 7 challenges in web exploitation, reverse engineering, forensics, and industrial control systems (ICS) security

Threat Intelligence Report: 9002 Trojan

- Researched the spear-phishing-delivered 9002 Trojan and modeled its attack lifecycle, threat actors, indicators, and attack patterns in a formal report using STIX and Soltra Edge

Hand-Tracking Robot

- Hardware lead on a team build; programmed movement in C++ with an ultrasonic sensor and 3D printed the outer shell

EXPERIENCE

True Food Kitchen Tampa, FL

Busser *May 2026 – Present*

- Support service for 100+ guests per shift, following sanitation procedures and a 30-second table turnover standard
- Work with 10+ servers and kitchen staff to restock service stations and keep the floor safe during peak hours

LEADERSHIP & ACTIVITIES

Delta Tau Delta Fraternity Aug 2024 – Present

Finance Chair, Secretary Assistant, Social Chair

- Tracked chapter budgets and expenses, kept chapter records, and planned events for a 100-member chapter

Whitehatters Computer Security Club, USF Aug 2026 – Present

Member

- Attend meetings, tool demos, and hands-on security practice with other students

SKILLS

Security: Nmap, Metasploit, Wireshark, Kali Linux, Windows Event Viewer, MITRE ATT&CK, STIX, VMware, vulnerability assessment, log analysis, risk management
Networking & Cloud: TCP/IP, IPv4/IPv6, packet analysis, AWS (VPC, subnets, security groups)
Programming: Python, C, C++, MySQL
